

## Material - ASME SA-240 Type 26-3-3

Standard Specification for Chromium and Chromium-Nickel Stainless Steel Plate, Sheet, and Strip for Pressure Vessels and for General Applications

**Group - Ferrous Stainless Steel Alloys** 

Sub Group - ASME SA-240 Type 26-3-3 Chromium and Chromium-Nickel Stainless Steel for Pressure Vessels and for General Applications

Application - Intended for Valve, Pump, General Engineering, Automotive and Other Industries Grade Belongs to the Industry - Steel, Sheet, Plate and Strip

| Chemical Composition |      |                 | Heat Treatment                     |          |
|----------------------|------|-----------------|------------------------------------|----------|
| Carbon               | C %  | 0.030 max.      |                                    |          |
| Silicon              | Si % | 1.000 max.      |                                    |          |
| Manganese            | Mn % | 1.000 max.      |                                    |          |
| Phosphorus           | P %  | 0.040 max.      | Annealing or Hardening + Tempering |          |
| Sulphur              | S %  | 0.030 max.      |                                    |          |
| Chromium             | Cr % | 25.000 - 28.000 |                                    |          |
| Molybdenum           | Mo % | 3.000 - 4.000   |                                    |          |
| Nickel               | Ni % | 1.000 - 3.500   |                                    |          |
| Nitrogen             | N %  | 0.040 max.      | Mechanical Properties              |          |
| Titanium             | Ti % | 0.200 - 1.000   | Tensile Strength in Mpa            | 585 min. |
| Iron                 | Fe % | Balance         | Yield Strength in Mpa              | 450 min. |
| -                    | -    | -               | Elongation in %                    | 18 min.  |
| -                    | -    | -               | Reduction of Area in %             | -        |
| -                    | -    | -               | Hardn <mark>ess in HB</mark>       | 241 max. |
| -                    | -    |                 | Impact in Joule                    | -        |

| Cross Reference Table |          |         |                               |  |  |
|-----------------------|----------|---------|-------------------------------|--|--|
| Material              | Standard | Country | Grade Belong to the Industry  |  |  |
